**Residents urged caution in wake of significant rainfall**

**FOR IMMEDIATE RELEASE, OCTOBER 30, 2015:**

*NEW BRAUNFELS* — Comal County has received between 10-15 inches of rain overnight and into this morning, including between 9-12 inches between Canyon Dam and New Braunfels. The county has activated its emergency operations center, and residents along River Road are being asked to seek higher ground via the county's Emergency Notification System.

“Although the rain appears to have stopped, we received significant rainfall in the Guadalupe watershed, and anyone in a flood-prone area should monitor conditions and take actions to keep themselves and their families safe,” said Jeff Kelley, emergency management coordinator.

Real-time updates of low water crossings and river levels can be found at the Comal County Engineer's Office webpage, [cceo.org](http://cceo.org).

Most low water crossings in the county are now closed, and National Weather Service and Guadalupe-Blanco River Authority estimates indicate the Guadalupe and Comal rivers in and south of New Braunfels will enter flood stage this afternoon. Flooding has already been reported in Bulverde and Spring Branch, where the most severe rainfall took place, and the Guadalupe River level has already risen significantly along River Road.

Additional updates will be provided as new information becomes available.
